

David Sharma

FULLSTACK - DEVELOPER · SOLUTION ARCHITECT

Beim Grünen Jäger 24, 20359 Hamburg

📧 | ✉️ mail@david-sharma.de | 🏠 www.david-sharma.de | 📱 sharma91 | 📺 david-sharma-163556113

Skills

DevOps	GCloud, Azure, Docker, Kubernetes, Terraform, TeamCity, OpenShift
Backend/Frontend	Spring Boot, Spring Webflux, Hibernate, WebMethods, RestAPI, React, Streamlit, Vaadin
Programming	Java, JavaScript, Python, C#, HTML

Work Experience

Vattenfall

Software Engineer

Hamburg

since 04.2024

- Fullstack-Developer (Angular/Kotlin/Kafka)

Commerzbank AG

Senior Cloud Engineer

Frankfurt am Main

07.2023 - 04.2024

- Developed implementation plans and **architectural designs** for migrating Data Science applications to the cloud, considering current and future solutions.
- Migration of on-premise services to Google Cloud leveraging various GCP services, while conceptualizing and enhancing a Python frontend with the Streamlit framework for data-driven corporate credit processing.

Fullstack Developer

05.2022 - 06.2023

- **Responsibility** for a **Spring-Webflux** application, setting up a performance monitoring solution with **JMeter/Grafana/Prometheus**, memory leak analysis, TLS encryption integration in **Spring Security**
- Supervision of junior colleagues, partial responsibility for defect management, deployments, and **CI/CD optimizations (Teamcity/OpenShift)**
- Responsible for frontend components in **React**, performance optimization of React components

Software Engineer - IT Trainee Program

12.2020 - 04.2022

- Migration of an infrastructure project to **GCP** - adjustment of **Terraform, Helm, and Kubernetes scripts**
- Connecting an external cloud platform to **Azure-ADFS** through **SAML-based SSO integration**
- Dynamics CRM: Migration of existing **WebMethods services**, development of a WebMethods service for batch processing

PPI AG

Master's Thesis Student

Hamburg

06.2020 - 12. 2020

- Design & Development of a **Conversational AI** in the insurance sector based on the RASA framework

adesso AG, Sopra Steria, Beiersdorf AG

Student Intern / Intern - IT Department

Hamburg

11.2018 - 08.2019

- Software development - **Microservices with Spring Boot** in the Public Sector
- Development of a generic test strategy for **test automation** and implementation of a prototype in Selenium
- Creation of a model for the creation of a consortium contract based on blockchain technology **Ethereum**

Bosch.IO

Backend Developer - Student Intern

Stuttgart

04.2018 - 09.2018

- Design and implementation of a simulation of vehicle communication devices based on a multi-agent system in **Java (Spring Boot)**
- Implementation of a **certification component** for certificate generation and deployment of the application in the cloud

adesso AG

Bachelor's Thesis Student

Stuttgart

03.2017 - 08.2017

- Implementation of a reference architecture for a decentralized controlled intralogistics system based on a **multi-agent system in Java**
- Development of middleware to communicate with an SPS via cloud protocols (**MQTT, REST**)

Fraunhofer IPA

Fullstack Developer - Internship / Student Intern

Stuttgart

03.2016 - 02.2017

- Design & Development of a microservice application (**Backend - Spring Boot / Frontend - Vaadin**) in the field of Industry 4.0
- Implementation of a **REST API** in an existing cloud application

Education

IT Management & Consulting MSc (1.3)

Study Abroad in Taiwan (Taipei) - Computer Science - Information Engineering

University of Hamburg

2018 - 2020

Business Informatics MSc (1.3)

1 Semester - then University Transfer

Reutlingen University

2018

Business Informatics BSc (1.3)

Reutlingen University | 2014-2018

Insurance and Finance Clerk (1.3)

E+H Group | 2011-2014
